RELEASE: November 28, 2005

Public Input Sought by MVC for Inspection System

(TRENTON) – The contractor researching potential changes to New Jersey's Motor Vehicle Inspection System will hold a public Stakeholder Discussion on November 30 from 9:30 a.m. to 3:30 p.m. at 225 East State Street, Trenton, the NJ Motor Vehicle Commission (MVC) administration headquarters.

MACTEC, Inc. will collect input for MVC and the NJ Department of Environmental Protection (DEP), which oversee the state's vehicle inspection system. The discussion will take place in the 8 East Conference room at MVC headquarters.

The public is invited to share their views and opinions to help the state evaluate the current Motor Vehicle Inspection System. Public opinion is being sought regarding the design of this system.

MACTEC will consider all submitted views as they conceptualize and research potential modifications to the vehicle inspection system. MVC and DEP co-manage New Jersey's vehicle safety and emission, and associated data management, systems.

Any member of the public who would like to attend this discussion or submit a presentation before the attending stakeholders should contact Dan Dozier, MACTEC facilitator, at (301) 657-4113, or via e-mail at ddozier@mediate.org.
